

Revenue & Key Business Metrics in Excel

A complete guide to calculating and tracking
revenue, profit, growth, and performance KPIs

■ Revenue

■ Growth

■ Profit

■ KPIs

Total Revenue

Gross Profit

Net Profit

`=SUM(B2:B13)`

Revenue – COGS

Gross – Expenses

Revenue Metrics

Understanding income streams and total revenue calculations

Page 2 of 5

What is Revenue?

Revenue is the total income earned from selling products or services before any expenses are deducted.

CORE REVENUE FORMULAS

Total Revenue

=SUM(Revenue Range)

=SUM(B2:B13)

Adds all revenue values across months/periods

Average Revenue

=AVERAGE(Revenue)

=AVERAGE(B2:B13)

Calculates mean revenue per time period

Revenue Growth

=(New-Old)/Old*100

=(B13-B2)/B2*100

Percentage change from start to end period

REVENUE BREAKDOWN TABLE EXAMPLE

Month	Product Sales	Service Revenue	Total Revenue	vs Prior Month
January	■ 45,000	■ 12,000	■ 57,000	—
February	■ 52,000	■ 14,500	■ 66,500	+16.7%
March	■ 48,000	■ 16,000	■ 64,000	-3.8%
April	■ 61,000	■ 18,200	■ 79,200	+23.7%
May	■ 67,500	■ 20,000	■ 87,500	+10.5%
TOTAL	■ 2,73,500	■ 80,700	■ 3,54,200	+53.5%

Excel Tip: Use =SUM(C2:C13) for product sales total. For growth: =(D13-D2)/D2*100 then format as Percentage.

Apply Conditional Formatting to highlight months with revenue above average automatically.

Profit & Cost Metrics

Gross profit, net profit, margins and expense tracking

Page 3 of 5

GROSS PROFIT

■ 2,10,000

Revenue – COGS

NET PROFIT

■ 1,25,000

Gross – All Expenses

EBITDA

■ 1,45,000

Earnings before tax & interest

PROFIT FORMULAS

Metric	Formula Logic	Excel Formula	
Gross Profit	=Revenue – Cost of Goods Sold	=B2–C2	
Gross Profit Margin %	=(Gross Profit / Revenue) × 100	=(D2/B2) *100	
Net Profit	=Gross Profit – Operating Expenses	=D2–E2	
Net Profit Margin %	=(Net Profit / Revenue) × 100	=(F2/B2) *100	
COGS Ratio	=(COGS / Revenue) × 100	=(C2/B2) *100	
Break-Even Point	=Fixed Costs / (Price – Variable Cost)	=E2/(B2/units–C2/units)	

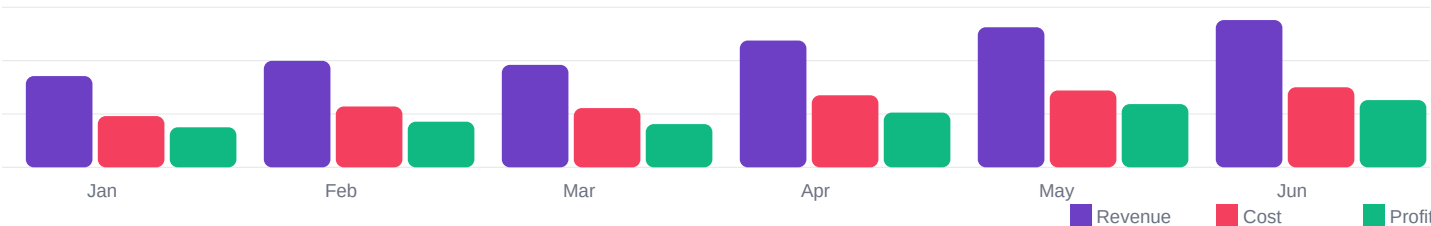

Gross Profit Margin

Measures how much profit is made after paying COGS. A higher % means the company keeps more of each rupee of revenue.
Industry benchmark: 40-60% (retail: 20-30%)

Net Profit Margin

Shows overall profitability after ALL costs. Key indicator of business health and efficiency. Track monthly in Excel.
Good margin: 10-20% for most industries

MONTHLY PROFIT TREND (VISUAL REPRESENTATION)

Key Business KPIs

Customer, operational & performance indicators tracked in Excel

Page 4 of 5

Customer Acquisition Cost (CAC)

Total Marketing Cost / New Customers

=E2/F2

Customer Lifetime Value (CLV)

Avg Purchase × Frequency × Duration

=G2*H2*I2

Return on Investment (ROI)

(Net Profit / Investment) × 100

=(D2/J2)*100

Inventory Turnover

COGS / Average Inventory

=C2/K2

Current Ratio

Current Assets / Current Liabilities

=L2/M2

Revenue per Employee

Total Revenue / No. of Employees

=B2/N2

EXCEL DASHBOARD SETUP GUIDE

1

Set Up Data Sheet

Create a sheet named 'Data' with columns: Month, Revenue, COGS, Expenses, Customers, Emplo...

2

Create Metrics Sheet

In a new sheet, reference Data cells using = formulas. Example: =Data!B2 to pull revenue.

3

Add Calculated KPIs

Use IF, IFERROR to handle zeros. Format cells: Currency (¤), Percentage (%), Number with c...

4

Build Dashboard

Insert Charts (Line for trends, Bar for comparisons, Pie for breakdown). Use Pivot Tables ...

Quick Reference & Summary

All formulas and tips at a glance

COMPLETE EXCEL FORMULA CHEAT SHEET

Metric	Excel Formula	Format As
Total Revenue	=SUM(B2:B13)	Currency
Average Monthly Revenue	=AVERAGE(B2:B13)	Currency
Revenue Growth %	=(B13-B2)/B2*100	Percentage
Gross Profit	=B2-C2	Currency
Gross Margin %	=(B2-C2)/B2*100	Percentage
Net Profit	=D2-E2	Currency
Net Margin %	=F2/B2*100	Percentage
ROI %	=(F2-J2)/J2*100	Percentage
CAC	=E2/F2	Currency
CLV	=G2*H2*I2	Currency
Inventory Turnover	=C2/K2	Number
Current Ratio	=L2/M2	Number (2 decimal)
Break-Even Units	=Fixed_Cost/(Price-VarCost)	Number
YoY Growth %	=(ThisYear-LastYear)/LastYear*100	Percentage

Format Tip

Select cells → Ctrl+1 → choose Currency or Percentage format

Chart Tip

Select data → Insert → Recommended Charts for instant visuals

Auto Tip

Use named ranges (Formulas → Define Name) for cleaner formulas
